

λ-NET-Voice-Preselection

Key Benefits

- Billing per second
- No need to change telephone numbers
- Excellent voice quality and highest network availability

© LambdaNet Communications

High-performance voice service

Would your company like to use high-availability telephone services with all state-of-the-art features while cutting your telephone costs? The LambdaNet voice offer includes different products which are tailored exactly to the requirements of corporate customers.

λ-Net-Voice is a synonym for excellent voice quality and highest availability levels. When LambdaNet implements your new voice service, your individual goals will of course be realized.

λ-Net-Voice-Preselection

Choose λ-Net-Voice-Preselection to opt for a pre-configured telephone connection. This means that LambdaNet will act as your network operator so that your outbound calls will automatically be routed via our high-quality network at extremely competitive prices. No need to mention that you are still free to use any alternative carrier of your preference ("call-by-call").

Just register for our service – we will take care of the rest

LambdaNet will take all the necessary steps, such as requesting for activation etc. We will also make sure that you can keep your current phone number and your phone book entry. It usually takes us just a few days to switch over your connection.

Simple pricing

Based on your individual user patterns, we will work out an optimized pricing structure that meets your requirements. Just check and compare our simple and transparent tariff options. All your billing data can be accessed via our web-based customer portal, including detailed call records.
